Subject: FW: Updated PDI Schedule? (sf)
Attachments: [PH Pre-RD Field Sampling Schedule_03132018.pdf](#)

Hi Sean.

The last schedule update we have from the Pre-RD Group was from 3-13-18 (attached), but it is quickly becoming obsolete with late breaking revisions to their planned events. For instance

- They decided to begin surface sediment collection last Friday (3/30), instead of conducting surface water sampling which was scheduled to start 3/28
- They haven't finished Bathymetry – currently on hold for the shallower regions of the site (We understand they are waiting for river stages to rise to gain access)
- Some uncertainty exists with their scheduled start for surface water sampling (haven't heard what their latest plans are for this).
- There are planning and safety document issues to resolve before starting Sed. Trap installation (scheduled on this document as starting today – not happening) and
- Fish Acoustic tracking scheduled for startup Thursday –EPA has not received their TSHA for review.
- Other planning documents pending resolution, or review include: QAPP (currently conditionally approved), Porewater FSP, Subsurface Coring FSP, and Fish Tissue FSP.

Madi, I'm sure we do—I'll see what the latest is at get back to you once I confer with Scott. (I'll likely send the update to the whole TCT).

See you soon!

Subject: Updated PDI Schedule?

Good Morning Sean,

Do you have an update on PDI status handy e.g., which FSPs have been approved, which continue to be iterated, and the field work that is underway and planned?

Look forward to connecting this afternoon; I have meetings at your office (I'm already in town) this afternoon with Joanne Labaw at 3 pm and with Laura re: fish advisory at 4 pm and then plan to meet up with you and others.

Thank you,

Madi
